DETAILED ACTION

The Amendment filed on 04 May 2004 has been acknowledged. However, upon further reviewing of the application, an Election/Restriction Requirement is as follows:

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7 and 9-18, drawn to a structure (having a first surface greater than or less than a second width), classified in class 347, subclass 44.
- II. Claim 8, drawn to a structure (having a reinforcement structure), classified in class 257, subclass 618.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a reinforcement structure extending across the slot. See MPEP § 806.05(d).

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
